

CDS Database – All 16 Tables

1. vendor

Stores supplier information.

Column	Type	Description
vendor_id	SERIAL	Primary Key
name	TEXT	Vendor name (not null)
address	TEXT	Optional
supplies_raw_materials	BOOLEAN	TRUE if sells raw ingredients
supplies_ready_expiry	BOOLEAN	TRUE if sells daily-expiry items
supplies_ready_non_expiry	BOOLEAN	TRUE if sells non-expiry items

2. vendor_phone

Phone numbers for vendors (composite PK).

Column	Type	Description
vendor_id	INTEGER	FK to vendor
phone_number	TEXT	Contact number

3. raw_material

Ingredients used in kitchen.

Column	Type	Description
raw_material_id	SERIAL	Primary Key
name	TEXT	Unique name
unit	TEXT	kg, litre, piece
current_stock	DECIMAL	Quantity on hand
reorder_level	DECIMAL	Low stock alert
average_unit_cost	DECIMAL	Weighted average cost

4. menu_item

All sellable products (prepared meals + ready-made).

Column	Type	Description
menu_item_id	SERIAL	Primary Key
name	TEXT	Unique name
selling_price	DECIMAL	Price to student
is_prepared_in_kitchen	BOOLEAN	TRUE = needs token
expires_daily	BOOLEAN	TRUE = expires end of day
is_purchasable	BOOLEAN	TRUE = can buy from vendor
request_mode	VARCHAR	Low(8), Mid(4), High(1)

5. ready_made_stock

Non-expiry stock (e.g., Coke bottles).

Column	Type	Description
--------	------	-------------

Column	Type	Description
stock_id	SERIAL	Primary Key
menu_item_id	INT	FK to menu_item
current_stock	INT	Available quantity
reorder_level	INT	Low stock alert
average_unit_cost	DECIMAL	Weighted average cost

6. ready_made_daily_stock

Daily tracking for expiry items (shingara, samosa).

Column	Type	Description
daily_stock_id	SERIAL	Primary Key
menu_item_id	INT	FK to menu_item
stock_date	DATE	Date of record
day_of_week	VARCHAR	e.g., Monday
quantity_received	INT	Received today
quantity_sold	INT	Sold today
quantity_wasted	INT	Discarded at day end
average_unit_cost	DECIMAL	Today's batch cost

7. customer

All customers. Guest is ID=1.

Column	Type	Description
--------	------	-------------

Column	Type	Description
customer_id	SERIAL	Primary Key
name	TEXT	Customer name
phone	TEXT	Unique, NULL for Guest
id_type	VARCHAR	student or nid
id_number	TEXT	Roll number or NID
is_temporary	BOOLEAN	TRUE = Guest
created_at	TIMESTAMP	Registration time

8. customer_order

Every sale. Token = '#' + order_id.

Column	Type	Description
order_id	SERIAL	Primary Key (token)
customer_id	INT	FK to customer
order_timestamp	TIMESTAMP	When placed
total_paid	DECIMAL	Total amount
payment_method	VARCHAR	cash or mobile
status	VARCHAR	paid→preparing→ready→served
last_status_update	TIMESTAMP	Auto-updated
dine_in_takeaway	VARCHAR	dine_in, takeaway, NULL

9. kitchen_batch_issue

Prepared meal batches (per-item, daily numbering).

Column	Type	Description
batch_id	SERIAL	Primary Key
menu_item_id	INT	FK to menu_item
issued_at	TIMESTAMP	Creation time
status	VARCHAR	preparing→available→exhausted
notes	TEXT	Optional

10. kitchen_batch_issue_line

Raw materials used per batch.

Column	Type	Description
line_id	SERIAL	Primary Key
batch_id	INT	FK to kitchen_batch_issue
raw_material_id	INT	FK to raw_material
quantity_taken	DECIMAL	Amount used
unit_cost_at_time	DECIMAL	Cost snapshot

11. kitchen_request

Escalation when cashier exceeds mode limit.

Column	Type	Description
request_id	SERIAL	Primary Key
order_id	INT	FK to customer_order

Column	Type	Description
menu_item_id	INT	FK to menu_item
requested_quantity	INT	Plates requested
status	VARCHAR	pending/approved/rejected
approved_quantity	INT	Kitchen approved amount
requested_at	TIMESTAMP	Request time
responded_at	TIMESTAMP	Response time

12. stockout_request

Lost sales when item is unavailable.

Column	Type	Description
request_id	SERIAL	Primary Key
menu_item_id	INT	FK to menu_item
request_date	DATE	Date
day_of_week	VARCHAR	e.g., Monday
request_time	TIMESTAMP	Exact time
quantity	INT	Units wanted

13. stock_recommendation

Weekly stocking suggestions.

Column	Type	Description
recommendation_id	SERIAL	Primary Key

Column	Type	Description
menu_item_id	INT	FK to menu_item
target_day_of_week	VARCHAR	Day this is for
recommended_quantity	INT	Suggested stock
weeks_considered	INT	Data weeks used
calculated_on	TIMESTAMP	When computed
overridden_by	TEXT	Who changed it
override_reason	TEXT	Why changed
is_active	BOOLEAN	Current recommendation

14. purchase_order

Vendor purchase header.

Column	Type	Description
purchase_order_id	SERIAL	Primary Key
vendor_id	INT	FK to vendor
order_date	DATE	Purchase date
total_amount	DECIMAL	Optional total
notes	TEXT	Optional

15. purchase_order_line

Items in a vendor purchase.

Column	Type	Description
--------	------	-------------

Column	Type	Description
line_id	SERIAL	Primary Key
purchase_order_id	INT	FK to purchase_order
item_type	VARCHAR	raw_material or ready_made
item_id	INT	FK to raw_material or menu_item
quantity	DECIMAL	Units bought
unit_cost	DECIMAL	Price per unit

16. order_line

Items in a customer's order.

Column	Type	Description
order_line_id	SERIAL	Primary Key
order_id	INT	FK to customer_order
menu_item_id	INT	FK to menu_item
batch_id	INT	FK to kitchen_batch_issue (prepared only)
quantity	INT	Units sold
unit_price_snapshot	DECIMAL	Price at sale time
unit_cost_at_time	DECIMAL	Cost snapshot (ready-made only)
